Please note that the units identified as having applications is different from the information Geoff provided yesterday, see attached. No blame but we are going to have to confirm this one way or another, particularly when it comes to future work that DOH/ATSDR will be conducting.

Subject: Information on residential units

Hi Eric:

As I mentioned on the recent phone call, CID received information of other applications of

pesticide at the Sirenusa complex on St. John. The application occurred in four units: Units H (upper), I (lower), J (lower), and H (lower) in October 2014.

As I mentioned on the phone, I'm relatively certain that the pesticide application at these units is known, but wanted to make sure that you had them.

Thanks.

Pat
